About Numerology Forecast

What are your general prospects in love, work and health in the next year?

Which days in next year will be favorable for new beginnings, creative work, finances, dating, entertainment, spending time with family, finishing old issues...?

All this you can find out from numerology cycle numbers, which can be calculated from your birth day and current calendar dates.

CYCLE NUMBERS

In nature everything turns in cycles, and by observing those cycles we can foresee the future. If we know the cycle of yearly seasons, for example, we can foretell in winter that spring will come again.

In numerology this universal law is expressed by cycle numbers, which constantly rotate in our life in different intervals – in nine years rounds, yearly, monthly, daily...

When cycles change, they also effect changes in our thinking and feeling, and consequently influence our decisions. This is so because in each cycle our different qualities and characteristics come to light.

PERSONAL AND UNIVERSAL CYCLE NUMBERS

Personal Cycle Numbers are based on our birth date, so their influence is personal. The most influential of them, our *Personal Year* number, indicates personal trends and conditions that we can expect in the next year. While the influence of *Personal Days* and *Personal Months* numbers is shorter, they can help us greatly in making decisions that await us in particular days and months.

Some personal cycle numbers influence us through longer periods; those are *Life Cycle*, *Life Pinnacles* and *Life Challenges* numbers, which all depict long-term trends in our life. Those numbers are included in our “Numerology Portrait” reading.

Universal Cycle Numbers are based on current calendar dates and effect all people. Those are *Universal Year*, *Universal Month* and *Universal Day* numbers. They describe global trends that influence all people in each year, month and day.

In numerology we deduct meaning from our birth date and current date by summing up its numbers. In most cases sum total is a two or three-figure number that is “reduced” into one-figure number by summing its ciphers. Exceptions are “master numbers” 11 and 22, which we do not reduce. Those double numbers have special meaning and interpretation.

NUMEROLOGY FORECAST

Numerology Forecast contains your Personal Years, Personal Months and Personal Days numbers and their meanings for one year ahead. Plus we offer you free subsequent forecast until your next birth day!

Beside each Personal Month you will also find your “lucky numbers” for this month. Those numbers are in tune with your personal vibrations, so you can use them, if you wish so, in lottery and similar hazard games.

By knowing your numerology cycles numbers you can effectively plan your future – you can be prepared for opportunities and challenges for each day, month and year. And if you are in harmony with your personal cycles, you will automatically attain your goals more easily.

Your Best Activities for the Year

At the beginning of each year, things change. Your internal urges shift. Your priorities may change. Your Personal Year number reveals what you can expect in this year.

Personal Year numbers go in a recurring nine-year cycle of development. Each time you go around the cycle you have a chance to do things with added wisdom and skill. A short description of a nine-year cycle: Personal Year One is a year of new beginnings, seed-planting, and high energy. A Two Personal Year is a year of relationships, sensitivity, and cooperation. Personal Year Three is characterized by creativity, motivation, and inspiration. Year Four is a year of hard work, discipline, and opportunities. Personal Year Five is for change, freedom, and unpredictability. In Year Six main themes are responsibility, domestic affairs, and service. Year Seven is a year of contemplation, self-awareness, and spiritual atonement. In Personal Year eight we can expect reward, respect, and recognition. And the Nine Personal Year is a year of completion, release, and transformation. Keeping your activities in tune with your current Personal Year vibration can make your existence more harmonious and keep your unfoldment upon its intended track.

Your Personal Year number combines your birth month and day with the current year. Personal Year begins and ends with your birthday, so that up until your birthday you would be using the personal year number for the preceding calendar year.

Your Personal Year number beginning on 1 Jan 2023 is 9

A Nine year has an underlying theme of “Endings” and it is case of coming ready or not. Many changes are set in motion during this year; however, many aspects of those changes will not always be evident until later the following year. Now is the time to have a spring clean of your life and clear out all the things (and people) that are no longer serving your highest good in life. This is a year of reviewing as well as letting go. Endings in life should be viewed optimistically, because they always preceded new beginnings. All relationships will be tested during this year and some will survive, but others won’t – don’t worry about this as those that go by the wayside were meant to.

A romantic relationship that happens in a Nine year is predestined, but rarely a lasting one. This year is about endings, so it is not a good time for starting new relations. And if it does last, it will probably be unstable.

In Personal Year 9 be aware of greater risks of physical exhaustion, fevers and accidents.

Your Personal Year number beginning on 1 Jan 2024 is 10/1

A personal number One year has an underlying theme of “New Beginnings.” Therefore your resolution for this year needs to be “I am willing to change” even if by nature change is not your middle name. This is your year to put fear aside and look to the future with courage. Be your own Knight in Shining Armor and charge off into the sunset saying “It is all positive and I am an original and confident person.”

It is also a good year to make a career change or start a new course of study. Look for those new opportunities and consider your possibilities and pursue something totally new which will bear fruit over the next few years. Don’t let anyone talk you out of your plans. Keep pushing ahead and do what you intuition tells you is right.

Number one year is favorable for all new beginnings, so it is good to fall in love in this period. You have all predispositions for successful and long standing relationship.

In Personal Year 1 take special care of your head and sense organs, which are more vulnerable and susceptible to illness this year.

Your Personal Month Numbers

Within the year, each month has its own vibration, which effects our thinking and feeling at that time. If we know the numbers of our Personal Months, we also know what to expect and how to act in months ahead of us.

MEANINGS OF PERSONAL MONTH NUMBERS:

1 – This is a great time to start a new project or relationship. Now you can create anything new. You may find yourself centered on healing or gaining clarity about your life. This is a terrific time to meditate on your goals and to manifest success. What you do this month can have long- ranging effects, so make it count! If you are looking to get pregnant, this would also be a good time to try.

2 – Create balance in your life. Spend time with your partner or get the perspective of close friends. If you’ve been a loner lately, then it is time to seek out friendship or romance. Take a look at where you have gotten on your own and see if you need to make some adjustments. You cannot get it all done alone right now. Having a second opinion or support of a close friend can create wonderful opportunities for you. If you have been dating someone or thinking of starting a new relationship, go for it. Creative people will find their work improved by the intuitiveness of the two month.

3 – Prepare to get busy. You may either be creating a masterpiece of some kind or you’ll be getting together with friends and colleagues. It may be a brainstorming session where you set a group goal or a get together with others who share the same spiritual values. Make plans to hang out with friends or co-workers. If you are an artist or creative person, put your work out there. This month is perfect for getting the exposure that you need. Just don’t overspend or overdo it on the partying. For the most part, this month will be exciting, creative, and social. Enjoy it!

4 – This is a month to get things in motion. It is a work month, so if you’ve got a significant project underway at your job then you’ll be working diligently on it. In a relationship take some time to look at how you can improve the situation with your partner. Meditate on what you want to create in your relationship or in your career and see what you need to do. Then, do it! The

actions you take may be small, but follow through no matter how challenging it may seem. You'll get so much more done than you think!

5 – It's time for a change. In this month your plans may get rearranged with or without your consent. You may find that your appointments are postponed or cancelled or you may have to use an entirely different route or approach to something that you do everyday. At work, you may find things shaking up or you may have responsibilities that are new. Don't fight the changes occurring in your job or your family. Just find a way to work with it. And if you've been feeling stuck or unhappy, then this is the month when you've got to make a shift. Analyze where you have been and where you are going. If you are walking in the wrong direction, turn yourself around and go in the direction that will take you where you need to go. A lot of different commitments may call your attention at the same time. But you've got the energy and enthusiasm to get it done. For those in a new relationship, five months are passionate and exciting, so do something fun!

6 – This month is related to peace, tranquility, and domesticity. If you've got a tense situation going on at home, or if you need to make some changes to your relationships, do it now! Or, examine what needs to be changed and set a plan in motion. What you don't resolve now can come back to haunt you later this year. Don't wait for that to happen. If you and your partner have been too busy to go out together, you need to take some time to cuddle up and be alone. This is the perfect month to try a yoga class or go to the spa. Meditate or take time to relax. Whatever makes you feel rested and peaceful is a good idea. You could re-decorate your room or take a creative class like painting, writing, or pottery.

7 – If you don't take the time for you this month, you won't get the full blessings that next month will bring you. If it is time to make a change in your life, let your intuition work for you. You are incredibly psychic this month and will sense things that you may not have been aware of before. If you are an artist, you'll find that your work is inspired and creative. Just make sure that you nurture yourself and get some advice from an intuitive friend, spiritual counselor or a minister if you need support. Do not let yourself get into a place where you think so hard about what is going on that you start to feel depressed. Don't beat yourself up about anything that's going on; just look at what you need to do to fix the problem.

8 – In numerology, eight is a terrific month to be in. Eights are about money, resources, leadership, and success. Just make sure that you are channeling your money for a good cause. In order to get, you need to become willing to give. Do you donate to charity? Don't go after money just for money's sake. You can attract tremendous resources if you have the best interests of yourself and others at heart. For those who have spent a long time struggling, this month could signal a change. If you've been waiting for the time when you could get a new job or sell an important product, this is the time to market yourself and get it into the hands of someone who can help you.

9 – If you've played your cards well this year, you are now reaping the benefits. If you have been feeling overworked, you need to take some time for yourself. Clean out your closet or your desk. Reorganize your plans and prepare for the new energies that are coming. Take time to relax, pray or reconnect to the Higher Power. For those contemplating taking a seminar, class, or going back to school, do it! If you are still finding your life difficult, you may need to re-think what you are doing. Somewhere along the way you invested your energy in the wrong place. If you have been holding onto a relationship that is not going anywhere or pushing yourself in a career or job that you do not like, you need to make some important decisions. Don't wallow in the past. You are alive today and you need to focus on how you can improve your life for tomorrow. New energy will come in next month for you to create a hopeful future.

11 – This is a special month, when you can operate at your creative best. Let your imagination work freely and be a source of inspiration to you.

As a master number, 11 is too high and potent a vibration to be used continuously. You will find that it is, in fact, a 2 vibration that motivates you in daily life (read the description for Personal Month Two).

22 – Seldom does one have the power of this master number to realize plans and ambitions. Seize this month to accomplish your most far-reaching goals!

Achieving the magnitude of a 22 vibration calls for special circumstances and special energies. You will find that it is in fact the 4 vibration that motivates your everyday existence. (read the description for Personal Month Four).

MEANINGS OF PERSONAL DAY NUMBERS:

1 – The number one day is one of the most dynamic. It is a day for beginnings or changes; the day to put new ideas into motion and begin things you have been planning. Today can be the day to lay the groundwork for plans that you wish to develop over a long period of time. The One day is full of activities but you also must reflect your sense of commitment to making things better or to make certain things happen for you.

Suitable Activities: Planting, Planning, Shopping, Creating...

2 – This is a good day to accomplish tasks which require cooperation. This can be a good time to enter into new relationships of any type. The number Two day carries with it very little power, allowing events to progress naturally on their own merit. It is a good day to be cooperative with others both at home and at work and to be sociable and pleasant. You should quietly help events forward but without changing, or attempting to change, directions; not a day for new undertakings.

Suitable Activities: Business deals, Romance, Competition...

3 – The number Three day is perfect for entertainment. You should spend it with good friends and family in a festive atmosphere. This is a good day for writing, practicing musical instruments or painting landscapes, and also to share services and resources with others. A good, entertaining, lay back day.

Suitable Activities: Abundance, Parties, Giving...

4 – The number Four day is a day to keep busy and productive. A good sustained effort in the right direction today could show some gains in important financial matters that you are involved in, either work or investments. This is not a day for starting new things or projects but rather pushing ahead those that are already in the works. This is a good day to handle required common tasks and chores. Don't stick your head in the sand; rather face the practical reality of everyday life.

Suitable Activities: Responsibility, Leading, Writing, Moving...

5 – The number Five day is a fast paced day geared to movers and shakers! Make the important changes today and don't be afraid to try something new. Your vibrations are up and you feel buoyant and full of pep; equal to every challenge. When your sense of adventure teams up with the excitement you feel today you can also have a lot of fun and feel greatly exhilarated. This is also a good day to reflect, catch up on reading, and leisure. Today can be a day when things don't seem to go totally right. It can be a day of loss, or failure. But it can also be a day of peace and relaxation.

Suitable Activities: Research, Down time, Change, Grief...

6 – This is a good day for both spending time with those people who are important to you and handling common tasks and chores that need to be done. The number Six day is focused almost exclusively on home. There may be domestic fights that need smoothing over or activities that you will enjoy with your family or you could be called on to give special service to the underprivileged. You should ooze love, friendship and affection on this peaceful day of service with the full knowledge that it will be returned in like kind.

Suitable Activities: Travel, Balance, Relationships, Cooking...

7 – This is a good day for planning, looking back, and evaluating. Accomplishments, both current and past, can be analyzed and valued for the effects they may have on the future. The number Seven day is made for meditating and getting in touch with your innermost feelings. It is also a good day for going back over your most recent activities to judge the merits of your actions and see what you would most need to change. No new beginnings or changes for this day though, leave that to another time better suited for those activities.

Suitable Activities: Gardening, Planning, Board Games, Hindsight...

8 – The number Eight day is the day when you possess a great ability to make many things happen. This is potentially the most dynamic day and using the personal power you possess in a fair and equitable manner will reap many dividends for you on a personal basis. Keeping in mind the needs and abilities of others you can gain much from new business ventures. A good day for sporting events, contracts, and challenges. Business and legal dealings of all kinds can be very effective today. Discrimination and trust are important factors today.

Suitable Activities: Sports, Business deals, Analysis...

9 – Today you can complete many things that you have had in the works, even the hard to end things! Some of these endings can bring much drama and emotion but will be easier on a Nine day than at any other time. Put forth your compassion and understanding but if a situation needs ending you should go ahead no matter how high the emotion runs. Today can be a good day to move away from certain ideals or positions and into new situations. It can be a good day to spend alone, thinking about the past few days and your present circumstances.

Suitable Activities: House cleaning, Exercise, Reading, Moving...

11 – Today you should forget practicalities and use a great opportunity to communicate your ideas to others.

Master number 11 is too potent a vibration to be used continuously. It is a 2 vibration (that underlies 11) that mostly motivates you through the day (read the description for Day 2).

22 – A truly special day! Now you can go for the results for which you have long planned and schemed.

Master number 22 is too potent a vibration to be used continuously. It is a 4 vibration (that underlies 22) that mostly motivates you through the day (read the description for Day 4).

How To Go Further?

You can derive even greater benefit from your Numerology Forecast by using following tips:

1. Check For Double Personal Cycle Numbers. Let's say that in some month your Personal Month number is three, and your Personal Year number is also three. This means that the energy and power of number three in your life is doubled this month. Or even tripled – when your Personal Day is also number three in this month.

2. Also Analyze The Universal Cycle Numbers. Universal Day, Universal Month and Universal Year represent the general global “vibrations” that are felt by everybody on each calendar day, month and year. Energies of those universal cycle numbers collectively influence all people and are setting the scene for world events and trends.

To calculate the universal cycle numbers is very simple. Universal Year is a sum total of all the ciphers of current calendar year; Universal Month is a total of calendar month and year; and Universal Day is a sum of current calendar day, month and year. In most cases sum total is a two-figure number that is reduced into one-figure number by adding its ciphers. The “master numbers” 11 and 22 are not reduced.

General Meaning of Universal Years, Universal Months and Universal Days:

- 1 – Leadership, pioneering spirit, creative and innovative. New beginnings.
- 2 – Balance harmony, peace, cooperation, politics and details.
- 3 – Creativity, arts, entertainment, joy and activity.
- 4 – Practicality, hard work, laying a foundation for the future.
- 5 – Travel, communications, sales, sports, activities, sometimes revolutions, speculations and enthusiasm.
- 6 – Family vibration, community affairs, weddings, health, beauty, food and home.
- 7 – Intuition, analysis, improved finances, reclusive and inventive.
- 8 – Business, organization, expansion, corporations and enterprises.
- 9 – Completion, elimination, progress, compassion and understanding.
- 11 – Limelight, illumination, spiritual growth and aviation.
- 22 – Universal, national and international projects, politics, inventions and improvements.

3. Analyze Personal And Universal Cycle Numbers Side By Side. The influences of universal years, months and days mix with the influences of personal years, months and days. By parallel examination of both Personal and Universal cycle numbers we get more complete picture of the opportunities and challenges in coming days, months and years.

Some Examples:

- If your Personal Year number is for example 9, you should also check the number of current Universal Year and consider both meanings. Do the same with months and days.
- Let's say that your Personal Month is 4. You can decide that in this month you will utilize the energy of number four, which makes it easier to be organized and effective, on Universal Days with the same 4 number – for additional support of your endeavors.
- Take a note on your calendar of those Universal Days that have the same number as your Life Path (reduced sum total of your birth date). Those days are favorable for you.

Note: While Universal Years always start on the 1st of January, our Personal Years start on our birthdays. Universal Months coincide with calendar months, but Personal Months start on day of
